

# Absorber A700

Premium flexible sound absorber for studios, offices, Hifi, living rooms, call centers, banks, gastronomy, classrooms

above: A700 in a call center  
below: A700 in an office

Oversize A700 (900 x 200 cm) in a staircase

The A700 is a highly effective sound absorber designed for ambitious spaces. The fabric cover is printed individually and can be replaced by the customer easily whenever needed. A projection fabric for use as a screen is also avail-

able. The A700 improves the acoustical quality of a room drastically. This includes the increase of speech intelligibility as well as the reduction of noise levels, thereby increasing the ability to concentrate. These absorber are avail-

able as wall and ceiling modules and can be fitted freely suspended at the ceiling using a mounting kit. In addition to the standard dimensions custom and oversize designs are available.
